

ADLP-2 CH+ND

2 in 1 Portable Diode Laser + ND Yag

1 Machine – 7 Multiple Functions

- 1. Diode Hair Removal**
- 2. Tattoo Removal**
- 3. Carbon Facial**
- 4. Advanced Carbon Collagen Facial**
- 5. SPMU Removal**
- 6. Fungal Nail Eradication**
- 7. Pigmentation Reduction**

Diode Laser Hair Removal 1200W

Exclusive Features

- 100% Genuine Pure AuSn bar from USA Coherent.
- Super 1200w
- Guaranteed 10 million shots warranty, although the lifespan is nearer 20 million per handpiece.
- 3D Magnetic Smart tips

Intelligent Recognition

Unique Spot Size Crystals with Smart Intelligent Recognition Sensors.

Middle Size Crystal Tip 15*15mm -Precise targeting for under arms, face and bikini areas.

Large Size Crystal Tip 30* 15mm -Precise targeting for legs, chest and back areas

Mini Tip 08* mm – Precise targeting for intimate areas, monobrows, ear and nose hair

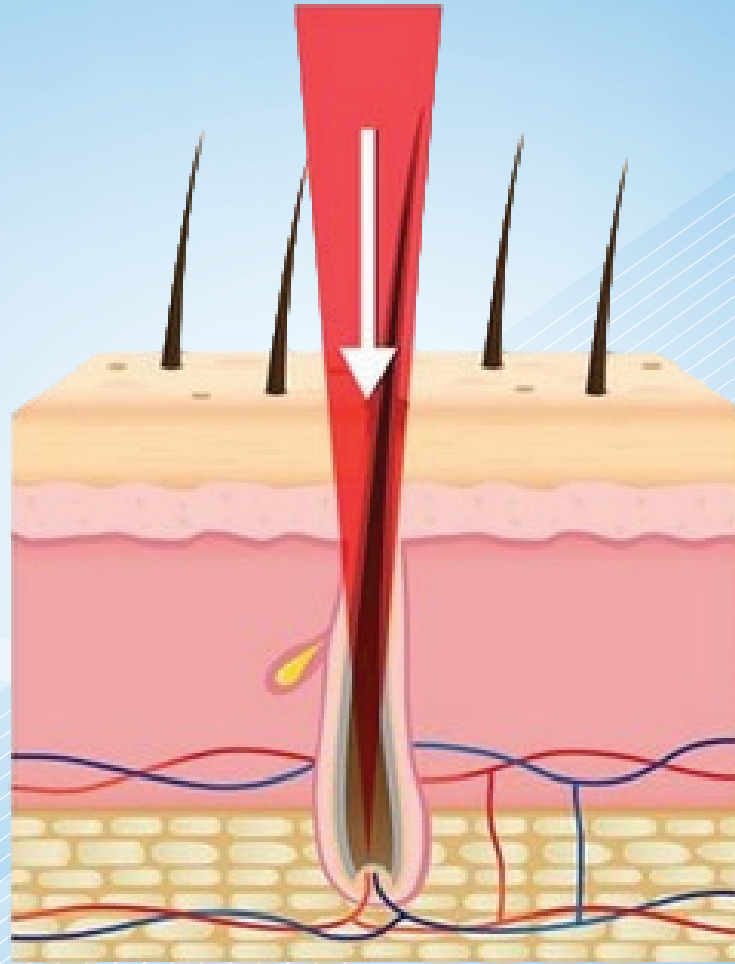

As soon as you put the crystal into the handpiece it will AUTOMATICALLY recognise your filter and pre-set your filters. No more hassle double checking your parameters!

360° Super Cooling

Guaranteed 360° full connection between the crystal and handle making the treatment painless and comfortable for your clients.

You Decide How Many Wavelengths You Want!

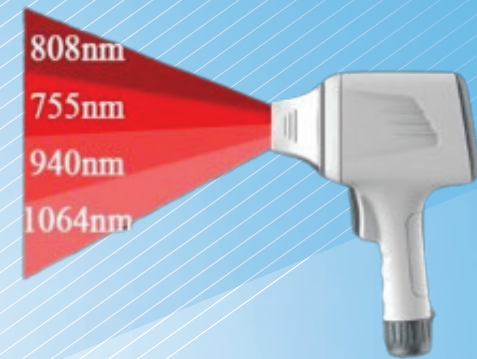

1 Wavelength – 808nm

3 Wavelength - 808nm + 755nm+1064nm

4 Wavelengths 808nm + 755nm+940nm +1064nm

What Exactly Do the Wavelengths Do?

755nm: Best suited for treating lighter skin types and fine hair.

808nm: Ideal for individuals with fair to medium skin tones. It targets the melanin in the hair follicle, effectively destroying it while leaving surrounding tissue unharmed.

940nm: Perfect for individuals with medium to dark skin tones. This specific wavelength penetrates deeper into the skin compared to other wavelengths and targets the hair follicle while minimising damage to surrounding tissue.

1064nm: This is the longest wavelength used in laser hair removal treatments. It penetrates deeper into the skin, making it ideal for targeting thicker and coarser hair.

ND:Yag Laser

Tattoo Removal – Carbon Facials – Fungal Nail Eradication

4 Wavelengths Included

- **1064nm:** Black Tattoo Removal
- **1320nm:** Carbon Peel Facial
- **755nm:** Advanced Collagen Peel
- **532nm:** Red ink and warm-toned colours such as brown, orange and violet.

AN UNBELIVABLE GUARANTEED SUPER LIFESPAN OF 1 MILLION SHOTS
5 x Longer than any other known competitor's brands!

Endured several clinical trial lifespan tests so we can 100% guarantee this!

Strong And Uniform Power

Fades Pigmentation With Minimal Energy

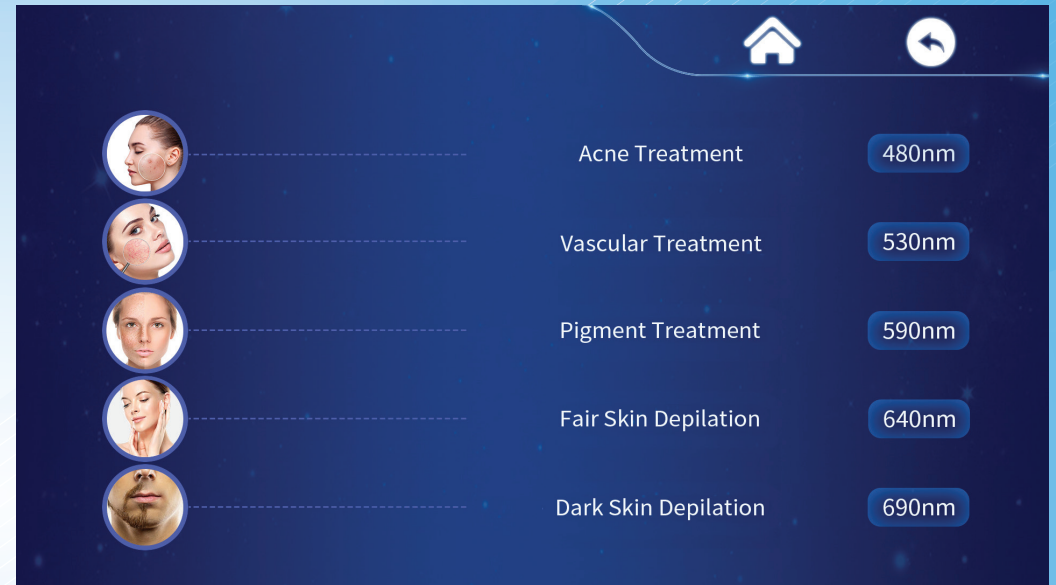

The handpiece is a true UK XENON Lamp and 06 rod reaching over 1600mj in energy.

Beautiful and uniform spot size

Clinically trialled on pigmentation emphasising its power on pigment but gentleness to the dermis.

Easy Interface

- Intelligent operating system
- Pre-set parameters
- Built in software to save clients files
- 15 different languages available on the screen
- Monitoring system
- Built in alarm system

Monitoring System

Advanced monitored system, less need for emergency engineer visits.

Each line stands for a specific part in the machine

S12V stands for control voltage

D1sV stands for control board

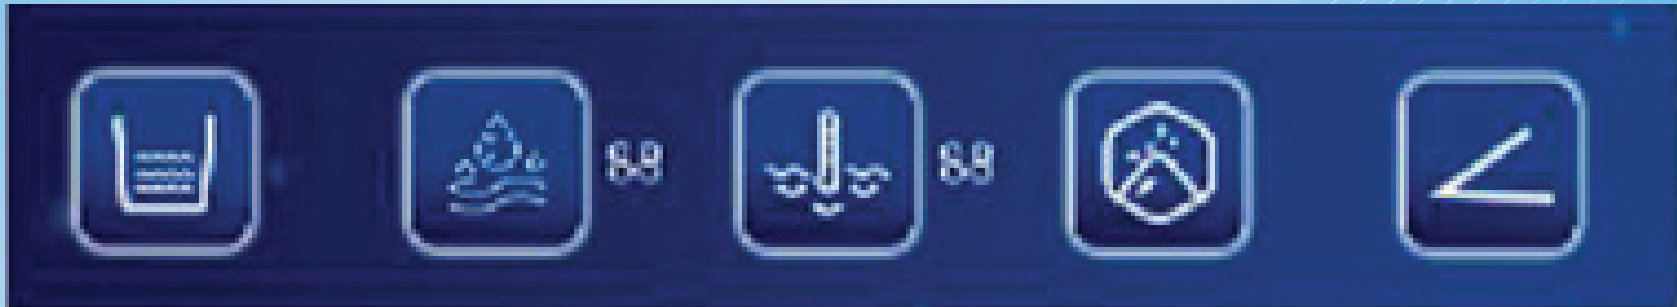

DOUT stands for cooling system

L12V stands for constant current power supply

In case there is any problems we can quickly identify on the monitoring system which part has the fault and 99 out of 100 times change the part on site.

Alarm System

Intelligent self-protection mode

The device is equipped with advanced self-protection software which will set an alarm when the critical elements need to be maintained.

- Water Flow Speed – This alarm reminds you to change new water filters
- Water Temperature - This alarm informs you the temperature is too hot or cold
- Water Impurity – This alarm reminds you it's time to change the water.
- Water Level – This alarm reminds you a water top up is due.
- Handle Button Status – This alarm reminds you to reset the hand trigger and to put the device back into standby.

Treatment Record Saving System

Save your clients parameters on the built in software file.

Advanced system to keep clients' records: the system allows you to insert all the client's parameters into the database: contact phone number, appointment date, contraindications (if any), treatment area and skin type and adjusted parameters.

Easy To Change Filter

A well-developed water filter sits on the outer case of the machine. Saving crucial time and mess.

- High Quality Parts
- Each and every part has been quality tested time and time again
- Good Structure ensures long term quality.

High Quality Parts

Every spare parts we use the best, every line is clear. Good structure ensures good quality

Technical Specifications

Specifications	Diode laser	Nd:Yag laser	
Lifespan	20 million shots	3 million shots	
Power	800W for laser, 2500W for machine	500W	
Spot Size	15*30mm & 15*15mm & 08mm	1-10mm	
Wavelength	808nm / 755+808+1064/755+808+940+1064	532/1064/1320nm	
Energy Density	1-90J/cm2	1000mJ/cm2	
Pulse Frequency	1-10Hz	1-10Hz	
Pulse Duration	10-200ms	20-30ns	
Laser Bars/Lamp	US Coherent laser bars	06+ UK Xenon lamp	
Cooling Level	Sapphire Crystal + Air + Closed Water Circulation + Semiconductor +TEC		
Display	11.6/15.6 inch True Color LCD touchable Screen		
Stand-by Working	Continuous stand-by working for 10-12hours		
Electrical	100/110V, 50~60Hz, /230V~260V,50~60Hz		
Net Weight	33KG	Gross Weight	42 KG
Packing Dimension	63*57*52cm (W*D*H)	Volume Weight	40 KG

It's not just the machine you are purchasing it's a set price for the full package including:

- Engineer delivery and set up of device
- Level 5 Tattoo Removal Focus Award Ofqual Approved (If you do not hold the pre-requisite CPD will be issued).
- 3 Days machine operator training at your location.
- All accessories, filters and manuals
- Start Up Kit worth £999 which consists of:
 - 4 Pairs of EN166 & EN207 safety glasses
 - Clients CE Non-Reflective Blackout Shields
 - 50pcs Sterile No Alcohol Wipes
 - 50pcs Cotton Pads
 - 50pcs Individual Aloe Vera bottles
 - Disposable razors
 - Micellar Water Wipes
 - Skin Tone Analyser Probe
 - Spa Headbands
 - CE Radio Frequency Gel bottles
 - 50PCS Disposable Kidney Dishes
 - Warning Signage
 - Carbon Paste 50g
 - Dolls Training head
 - Reusable surgical markers
 - Medical gloves

If You Already Hold Your Regulated Level 4 Qualification This Machine And Package Will Be Discounted By 20%.

24mths after sales warranty Skintastic Aesthetics Story

As the Managing Director of Skintastic Aesthetic Supplies LTD, I oversee the entire operation of the company, ensuring we meet our strategic goals and continue to grow. My role involves setting the direction for both the clinic and academy, ensuring we stay at the forefront of the aesthetics industry by adopting the latest technologies and adhering to current industry standards.

I also focus on business development, managing relationships with suppliers, industry professionals, and clients to drive growth, particularly in the sale of our medical-grade laser devices. On the training side, I ensure that our academy maintains high educational standards, giving our students real-world experience and accredited qualifications that align with industry needs.

An important part of my role is acting as a United Kingdom Responsible Person (UKRP) for medical device importations with the MHRA. This ensures that all imported devices meet UK regulatory standards, allowing us to provide our clients and students with safe and effective equipment.

At the heart of what we do is our commitment to delivering exceptional customer care. I oversee our client services to ensure that our treatments are both affordable and of the highest quality, helping us maintain our reputation for excellence.

In everything I do, my goal is to bridge innovation, education, and patient care to keep Skintastic a trusted leader in the non-surgical aesthetics field.
