

COSMETIC DEVICE FOR PROFESSIONAL CLINIC USE

Smasfocus X 20D

Multi-Line HIFU Skin Tightening System

High intensity focused ultrasound for the face, neck and body. Three handles, five frequencies and six treatment depths in one machine, with cartridge shot counts guaranteed in writing so you know what a treatment actually costs you before you buy.

Three handles included

1 to 11 adjustable lines

Five frequencies

Six treatment depths

15.6 inch touchscreen

Two year warranty

£6,999 plus VAT

One day CPD accredited training at our Southampton academy included.
Machine set up before it leaves us. Marketing image pack supplied.
Finance available, subject to status and lender approval.

HOW IT WORKS

Focused ultrasound, delivered to a chosen depth

HIFU focuses ultrasound energy to a precise point beneath the skin rather than heating everything above it. At the right depth that point of heat reaches the SMAS layer, the same structural layer a surgeon tightens in a facelift, and the body responds by remodelling collagen over the following weeks and months.

Non invasive

No needles, no incisions, no scarring. The energy passes through the surface of the skin and is focused below it.

No downtime

Clients go back to normal activities the same day, which is a large part of why the treatment is asked for so often.

Gradual, not instant

Collagen remodelling takes time. Most of the change appears over the weeks and months after treatment rather than on the day, and results vary from person to person.

We do not publish a figure for how long results last, and you should be careful of any supplier who does. It depends on age, skin condition, lifestyle and how many sessions are done, and there is no honest single number to give. Set your clients' expectations on that basis and they will thank you for it.

THE HANDLES

Three handles, and the shot counts are guaranteed

Cartridges are the running cost of a HIFU machine, so the shot count is the number that decides what a treatment costs you. All three handles come with the machine as standard.

20,000

Multi-Line handle

The main handle, for larger areas on the face and body. **1 to 11 adjustable lines per pass**, so you choose the intensity and coverage for the client in front of you. Works well on the abdomen, thighs, arms and the larger areas of the face. Guaranteed minimum 20,000 shots per cartridge.

10,000

Single-Line handle

For detailed facial work where accuracy matters. A single focused line for the brow, crow's feet, jawline and around the mouth. Guaranteed minimum 10,000 shots per cartridge.

60,000

Booster handle

Point energy for the small and delicate areas the other two cannot reach comfortably, around the eyes, the lips and fine facial features. The longest lasting cartridge of the three at a guaranteed 60,000 shots.

A note on the name. The machine is sold as a 20D system, but the manufacturer specification gives the multi-line range as **1 to 11 adjustable lines per pass**, and that is the figure we publish. If you see it advertised elsewhere as twenty simultaneous lines, ask to see the specification sheet.

TREATMENT AREAS

Face, neck and body

A full HIFU menu from one machine. Confirm with your own insurer that the areas you intend to offer are covered before you commit.

Face and neck

- ✓ Forehead, for horizontal lines and laxity across the upper face
- ✓ Brow and crow's feet, targeted lifting and softening of fine lines
- ✓ Cheeks and jawline, definition and contour through the mid face and jaw
- ✓ Neck and décolletage, tightening and smoothing
- ✓ Double chin, submental contouring

Body

- ✓ Abdomen and flanks, skin tightening and waistline contour
- ✓ Upper arms, laxity, tone and definition
- ✓ Thighs and knees, inner and outer thigh and around the knee
- ✓ Buttocks, non surgical lift and contour

We do not supply this machine for intimate or vaginal treatment and we do not sell an intimate probe with it. If that is what you are looking for, speak to us about the MED-870+ CO2 instead, which is a registered medical device with the correct handpieces and the manufacturer's own clinical protocol behind it.

DEPTHS AND ENERGY

Six depths, five frequencies, and you set the energy

The depth is chosen by the cartridge and the frequency, and the energy is set on the screen. That combination is what lets one machine treat the fine skin around an eye and the skin over an abdomen without compromise.

Face depths

- 1.5mm** for fine lines and the superficial dermis.
- 3.0mm** for dermal tightening.
- 4.5mm** for the SMAS layer, which is the lifting depth.

Body depths

- 6mm, 9mm and 13mm** for the deeper tissue on the abdomen, arms, thighs and buttocks.

Frequency and energy

- Five frequencies, **1.5, 3.0, 4.5, 7.0 and 10 MHz**.
- Energy adjustable from **0.1 to 2.0 joules** so you can work up gradually on a nervous client.

HIFU is ultrasound, not light. It does not fall under the laser and intense pulsed light rules, so it does not need a Laser Protection Adviser and it is not a Class 4 laser. That makes it a simpler machine to bring into a clinic than a laser.

Full specification

ITEM	SMASFOCUS X 20D
Technology	High intensity focused ultrasound (HIFU)
System type	20D multi-line HIFU
Handles supplied	Three. Multi-Line, Single-Line and Booster
Multi-line range	1 to 11 adjustable lines per pass
Frequencies	1.5 · 3.0 · 4.5 · 7.0 · 10 MHz
Energy range	0.1 to 2.0 J, adjustable
Cartridge depths	1.5mm · 3.0mm · 4.5mm face 6mm · 9mm · 13mm body
Multi-Line cartridge	20,000 guaranteed shots
Single-Line cartridge	10,000 guaranteed shots
Booster cartridge	60,000 guaranteed shots
Display	15.6 inch HD touchscreen
Machine power	100W
Electrical	110 to 240V AC, 50/60Hz
Dimensions	Approximately 58 × 40 × 130cm
Weight	Approximately 45kg
Colour options	Gloss white or midnight black
Custom branding	Your logo on the boot screen and on the shell, at no extra charge
Machine warranty	Two years
Handle warranty	One year, all three handles
Intended use	Professional aesthetic clinic use only
Classification	Cosmetic device. Not a medical device and not MHRA registered

Taken from the manufacturer specification. If you need the full sheet before you decide, ask and we will send it.

WHAT YOU GET

Everything is in the box

The machine

- ✓ Smasfocus X 20D with the 15.6 inch touchscreen, in your chosen finish
- ✓ All three handles, Multi-Line, Single-Line and Booster
- ✓ A full set of face treatment cartridges
- ✓ User manual
- ✓ Set up and configured before it leaves us, not shipped in a box for you to work out

Training and support

- ✓ One day CPD accredited training, in person at our Southampton academy
- ✓ Delivered one to one by experienced aesthetic educators
- ✓ CPD certificate on completion
- ✓ A pack of professional marketing images so you can promote the treatment from day one
- ✓ A named contact here afterwards, not a general helpline

Choose your finish

Gloss white suits a modern, clean treatment room. **Midnight black** suits a darker, higher end clinic space. Both cost the same.

Your logo, at no extra cost

Your own logo on the boot screen and on the machine shell. Clients see your brand on the equipment rather than a manufacturer name they have never heard of.

CLASSIFICATION

What this machine is, and what it is not

We are a supplier of MHRA registered medical lasers as well as cosmetic devices, and we are careful about the difference. It matters to your insurer and it matters to your council.

It is a cosmetic device

The Smasfocus X 20D is supplied for professional cosmetic use. It is **not a medical device**, it is **not registered with the MHRA**, and we will never describe it as either. Anyone selling you a HIFU machine as MHRA registered or MHRA approved is misleading you.

It is not a laser

HIFU is ultrasound, not light. It does not fall under the laser and intense pulsed light rules, so it does not need a Laser Protection Adviser and it is not a Class 4 laser. That makes it a simpler machine to bring into a clinic than a laser.

Two things to check for yourself before you buy. First, that your insurer covers HIFU and covers the specific areas you intend to treat, because policies vary more on HIFU than on almost anything else. Second, whether your local authority treats HIFU as a special treatment requiring a licence. Most do not, but some London boroughs write their special treatment conditions widely and it is a five minute phone call to be sure. We will help you with the wording if it is useful.

Two years on the machine, one on the handles

2

years

The machine, covering parts and technical support.

1

year

All three handles. Cartridges are consumables and are not covered.

- ✓ Warranty cover is provided directly by Skintastic, not by an overseas factory
- ✓ Technical support throughout the warranty period, from people who know the machine
- ✓ Replacement cartridges available directly from us
- ✓ Delivered quickly and securely to your clinic, set up and ready to use
- ✓ Full warranty terms available on request before you buy, not after

Finance

Available over two, three, four or five years. Skintastic Aesthetic Supplies Ltd is FCA authorised, firm reference 964293. We act as a credit broker, not a lender, and we take no commission from the lender. Finance is subject to status and to lender approval.

Use the calculator at skintasticaesthetics.com/finance to see an indicative monthly payment, or ask us for a decision in principle, usually back within two hours in working hours.

Talk to us before you buy

HIFU sells itself once a clinic knows how to use it, and the training is the part that decides whether it earns. Tell us about your room and your client list and we will tell you honestly whether this is the right machine for you.
