

980nm Diode Laser Thread Vein and Vascular System

Professional Cosmetic Laser System

A cosmetic device, not a medical device and not
MHRA registered.

*Designed for the appearance of thread veins,
spider veins and facial redness.*

£2,999 + VAT

WHY THIS SYSTEM

Why This System

The 980nm diode laser is designed to reduce the appearance of superficial facial vessels, supporting clearer-looking skin with a focused and controlled approach.

Targeted Absorption

Energy is absorbed by the blood within the vessel, supporting a reduction in its appearance while sparing the surrounding skin.

Quick and Comfortable Sessions

Designed for efficient treatment sessions with minimal downtime, supporting a smooth experience for clients.

Versatile Cosmetic Use

Supports the appearance of clearer skin across a range of superficial vascular concerns on the face.

APPEARANCE ONLY

What It Is Used For

The 980nm Diode Laser is designed to support the appearance of clearer skin across a range of superficial vascular concerns. Individual results vary from person to person.

**Facial Thread Veins
(Telangiectasia)**

Spider Naevi

Cherry Angiomas

Facial Redness

Visible Capillaries

Five Focus Rings

Five interchangeable focus rings from 0.2mm to 3.0mm. The 0.5mm ring is suited to most facial work, supporting precise targeting of superficial vessels.

Individual results vary from person to person. This system is designed to support the appearance of improvement and does not guarantee outcomes.

SPECIFICATIONS

At a Glance Specifications
